**Subject:** Census case

Greetings,

I'm a census enumerator in northern California, and have been told that our Santa Rosa regional field office plans to wrap things up by Sep. 30th, not Oct. 5th, even though our region has 17000 homes remaining in the region to be counted! The fire conditions have also continued to delay a proper count, especially in the rural areas. Please do something to help us! We really need to go until the end of October to have a chance at a reasonable count for our communities.

Thank you kindly
